

School is about to begin in just a few short weeks. We are booking field trips for the Fall and Spring seasons. We are doing our best to accommodate each individual school and teacher's schedule and objectives. Please call soon to book your field trip!

All of our programs are hands-on, allowing kids to experience Maryland's colonial history, participate at one of Maryland's largest on-going archaeological excavations, learn about colonial foodways, explore the interdependence of plants and animals in our 8-acre Woodland Garden, and learn how we know what we know about the African Americans who lived and built London Town.
